## ***Air\_Waste\_Health\_Water\_Energy\_Soil***

***This was the name and theme of a public art exhibition at Gleis 70 with 36 artistic interpretations from the cooperative. Installations, photographs, paintings, sculptures, performances, films and concepts on topics such as climate change, human health, recycling, biodiversity, environmental justice and biomimicry showed that art can also inspire people to act in a more environmentally conscious way.***

***AIR\_WASTE\_HEALTH\_WATER\_ENERGY\_SOIL also offered a rich side program including open air cinema, two scientists' tours, an exhibition tour, performances as well as workshops and a reading. The exhibition was very well received by the public with over 1000 visitors.***

***To get further impressions please go back to the opening webpage about house projects (Hausprojekte) and find:***
